

Language switcher Page Builder

Versie 6

Gepubliceerd 01-mrt-16 08:54 door [Paul Swaak](#) Laatst bijgewerkt 15-nov-18 21:04 door [Paul Swaak](#)

Put the below code in a RAW HTML widget. Note for future reference, take note of the class="language-english" and class="language-dutch", this are required to load the proper content.

```
<div class="language-english"></div>
<div class="language-dutch"></div>

<script>
$(function () {
var langCookie = $.cookie("Communifire_UserCulture");
var lang;
if(langCookie == 'nl-NL') {
lang = '.language-dutch';
} else {
lang = '.language-english';
}
$(lang).addClass('chosen-language');
});
</script>
```

New code 5 nov 2018

```
/*Language change script*/
$(function() {
$("select[name='ctl67$ctl02$LanguageDropDownList']").prop('onchange', false);
$("select[name='ctl67$ctl02$LanguageDropDownList']").change(function(){
    var selectedLang = this.value;
    if(selectedLang=="en-US"){
        $.cookie('Communifire_UserCulture', 'en-US');
```

```
window.location="https://dutchmobilityinnovations.com/landing-eng";  
 }else if(selectedLang=="nl-NL"){  
     $.cookie('Communifire_UserCulture', 'nl-NL');  
 window.location="https://dutchmobilityinnovations.com/landing-nl";  
 }  
});  
});  
/*Language change script*/
```

additional code nov 8, 2018

I have updated anchor link in the landing-eng page. for that I have added below line in page builder.

```
$('#brand').removeAttr('href').attr('href','https://dutchmobilityinnovations.com/landing-eng');
```
