

Adjust font in small column widgets

Versie 1

Gepubliceerd 27-jul-18 11:58 door [Paul Swaak](#) Laatst bijgewerkt 27-jul-18 11:58 door [Paul Swaak](#)

Hey Paul,

You can use CSS overrides to change the font size.

1. Right-click the font you want to change
2. Click Inspect
3. Select the element in the HTML source
4. Find its class name in styles and copy it
5. Create a CSS rule starting with `.span3 .axero-widget` or `.span4 .axero-widget` - **this** will apply the font size only in 3-span and 4-span columns

Example below.
