Use <https://publish.twitter.com> to create the embed code, then add it to Page Builder in a [Raw HTML Widget](#) or [Rich Text Widget](#) .

LinkedIn has plugins available that generate JavaScript code. <https://developer.linkedin.com/plugins>. Add the code to a raw HTML widget.

Edit the widget and add `<div style="height:500px; overflow:scroll;">` to the beginning and `</div>` to the end. You can change the value for height to your desired height.
