

# Podcasts toevoegen

Versie 2

Gepubliceerd 22-jul-19 11:05 door [Paul Swaak](#) Laatst bijgewerkt 23-jul-19 05:47 door [Paul Swaak](#)

Hey Paul,

1. You can upload podcasts to the [Files](#) section. You'll be able to add a description to the content.
2. You can also upload podcasts as [Articles](#) or [Blogs](#) . You'll be able to add a summary and featured image to the content. To do this, upload the audio file as an attachment, then use the [HTML audio element](#) to embed the audio in the content. Enter the attachment link as the `src`

```
<p><audio controls="controls">
<source src="horse.ogg" type="audio/ogg" />
<source src="https://dutchmobilityinnovations.com/attachment?file=3PwL4m5RwjRopI%2FRmIlRvQ%3D%3D" type="audio/mpeg" />
Your browser does not support the audio element.</audio></p>
```

1. Note that you'll need to make the following changes in Control Panel > System > [System Properties](#) first:
  - HTMLSanitizeAllowedAttributes: Add `controls`
  - HTMLSanitizeAllowedTags: Add `audio,source`
  - TinyMCEExtendedValidElements: Add `audio[src|type|controls],source`

Grace
