Sorry I got behind on this one. Yes according to the Weekly Digest Email documentation, you should be able to edit the template to include the following:

WeeklyDigestFeaturedOnly	Sets whether the weekly digest includes only featured content or all new content in the spaces
WeeklyDigestContentListTemplate	Sets the template for repeated spaces in digest emails Available mnemonics: {{ACTIVITY_DATE}} {{COMMENT_COUNT}} {{CONTENT_IMAGE}} {{CONTENT_IMAGE_CLASS}} — Used to hide the placeholder image (Add in styles in the element surrounding {{CONTENT_IMAGE}}) {{CONTENT_SUMMARY}} {{CONTENT_TITLE}} {{CONTENT_URL}} {{PROFILE_URL}} {{USER_DISPLAY_NAME}} {{VIEWCOUNT}}

This way you should be able to sort items by view count, as well as turn on Featured Only content.

The documentation goes more in depth as to what you can do with this.

Let me know if you have more questions.
