To embed twitter feed i Dynamic properties:

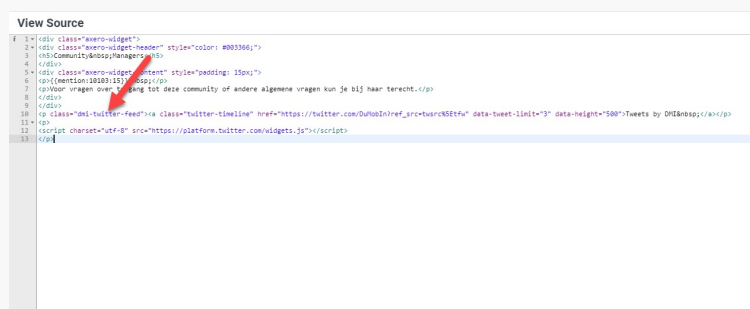

Here are the changes that I did:

1. Open this dynamic

property <https://dutchmobilityinnovations.com/spaces/manage/dynamic-properties/add-edit-property?spaceld=86&id=1649>

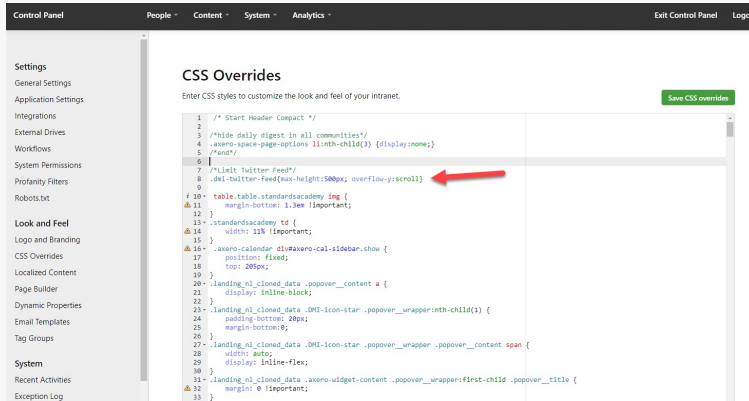

2. Content > View > View Source

3. I added a class named "dmi-twitter-feed" to target this element and make it scrollable, and

added a property data-tweet-limit="3" to limit the number of tweets.

4. Go to CSS Overrides <https://dutchmobilityinnovations.com/admin/settings/manage-css-overrides>

5. Modified the CSS a bit to make it scrollable and instead of targeting the iframe, I target the iframe container which is a p tag.

Result:
