

# Background color widgets

Versie 1

Gepubliceerd 19-okt-22 11:21 door [Caroline De Cristofaro](#) Laatst bijgewerkt 19-okt-22 11:21 door [Caroline De Cristofaro](#)

**First**, specify your CSS class in the Advanced tab of your widget, in this case I called mine mywidgetclass:

**Second**, use Chrome Developer tools or any css friendly tool to look at the CSS classes available to modify, in the example below i'm going to change the widget header background color to Yellow:

```
▼ <div id="divCommunityWrapper" class="axero-community-wrapper container snap-content">
  ::before
  ▼ <div class="container-fluid ">
    ::before
    ▼ <div class="row-fluid">
      ::before
      ▼ <div class="span12 ">
        ▼ <div class="axero-widget mywidgetclass "> == $0
          ▼ <div class="axero-widget-header">
            <h3>Rich Text</h3>
            </div>
            ▶ <div class="axero-widget-content axero-widget-content-padded axero-entity-formatted-content">...</div>
          </div>
          ::after
        </div>
        ::after
      </div>
    </div>
  </div>
  ::after
</div>
```

**Third**, add your CSS code to Control Panel > System > CSS Overrides

```
5
6 .mywidgetclass .axero-widget-header { background-color: yellow; }
7
```

**Fourth**, enjoy your results:

Rich Text

My Widget

NOTTE: to use whits smoke background i have added follwoign css code to css override:

```
.mywidgetbackground .container-fluid {background-color: whitesmoke; }
```

in the widget class just type: mywidgetbackrgound
