You can create a page to launch into your other apps. It will look something like this:

1. Create a [Page Builder](#) page.
2. Drag a 12 column row onto the page.
3. Drag a Raw HTML widget onto the page.
4. Doubleclick into the Raw HTML widget and add the following HTML into the window:

```
<div class="axero-widget">
  <div class="axero-widget-header">
    <h3>
      Launchpad
    </h3>
  </div>
  <div class="axero-widget-content">
    <div class="ax-app-logos">
      <div class="thumbnails">
        <li class="span3">
