You can create a stacked right template for events. It will look something like this:

Follow the steps below to create the Stacked Right - Events template.

## Template

1. [Add Page Builder Template](#)
2. Enter Stacked Right - Events as the template name
3. Select **GenericContentList** as the Widget Type

The screenshot shows the "Control Panel" with a navigation bar (People, Content, System, Analytics) and a "Page Builder Templates" section. The "Edit Template: Stacked Right - Events" configuration is shown:

- Widget Type:** GenericContentList
- Template Name:** Stacked Right - Events
- Widget Type:** GenericContentList
- Is Active:**
- Resource Keys CSV:** Resource Keys CSV

On the right, the widget's HTML code is displayed:

```
